

2022 CyberTipline Reports by Electronic Service Providers (ESP)

NCMEC's CyberTipline is the nation's centralized reporting system for the online exploitation of children, including child sexual abuse material, child sex trafficking and online enticement. In 2022, the CyberTipline received more than 32 million reports. More than 31.8 million of the these reports were from Electronic Service Providers that report instances of apparent child sexual abuse material that they become aware of on their systems.

U.S. based ESPs are legally required to report instances of "apparent child pornography" to the CyberTipline when they become aware of them, but there are no legal requirements for proactive efforts to detect this content or what information an ESP must include in a CyberTipline report. As a result, both the volume and content of reports can vary greatly. Higher numbers may indicate robust efforts to identify and remove abusive content. NCMEC encourages all companies to make identifying and reporting this content a priority. For more information about reports made in 2022, visit MissingKids.org/CyberTiplineData.

The following is a breakdown of reports by electronic service providers.
