

NCMEC's CyberTipline is a designated reporting mechanism for the public and electronic service providers (ESPs) to report instances of suspected child sexual exploitation. In 2023, the CyberTipline received more than 36.2 million reports, with the vast majority referring to incidents of suspected child sexual abuse material (CSAM). More than 35.9 million of the reports were from ESPs that reported instances of apparent child sexual abuse material they became aware of on their systems.

U.S. based ESPs are legally required to report instances of "apparent child pornography" to the CyberTipline when they become aware of them, but there are no legal requirements for proactive efforts to detect this content or what information an ESP must include in a CyberTipline report. As a result, both the volume and content of reports can vary greatly. For more information about reports made in 2023, visit NCMEC.org/CyberTiplineData.

The following is a breakdown of reports by electronic service providers.

ESP	Reports
