

Integrity Reports, Second Quarter 2025

UPDATED AUG 27, 2025

We're publishing our second quarter reports for 2025, including the [Community Standards Enforcement Report](#), our [Widely Viewed Content Report](#) and our [Oversight Board Report for H1 2025](#).

We are changing the format of our Adversarial Threat Report and will publish the updated report next quarter. All of the reports are available in our [Transparency Center](#).

Community Standards Enforcement Report

In January, we [announced](#) a series of steps to allow for more speech while working to make fewer mistakes, and our [last quarterly report](#) highlighted how we cut mistakes in half. The latest report continues to reflect this progress. Since we began our efforts to reduce over-enforcement, we've cut enforcement mistakes in the U.S. by more than 75% on a weekly basis. In our next quarterly report we plan to include global metrics on our mistakes so that people can track our progress.

In addition, during Q2 2025, prevalence of violating content continued to remain relatively consistent across most areas, with two exceptions:

- Reported prevalence of adult nudity and sexual activity appeared to increase on Instagram due to improvements in our measurement of these violations. There was no actual increase in views of the violating content.
- Prevalence of violent and graphic content increased on Facebook as a result of changes we made to reduce mistakes. We have since taken additional measures to mitigate this increase – including enhancing our enforcement guidance – and continue to monitor these changes.

We have focused our enforcement efforts on high-severity violations and illegal activity like drugs following changes announced in January, and we're sharing an update below on our approach to tackling illicit drug cartels and criminal organizations that try to abuse our platforms. You can read the full report [here](#).

Widely Viewed Content Report

In Q2 2025, the top 20 widely viewed domains collectively accounted for about 0.4% of all Feed content views overall, down from 0.6% during Q1. You can read the full report [here](#).

Oversight Board Report

In today's report we share more about how we are implementing the Oversight Board's 89 [recommendations](#). We publicly respond to every recommendation from the Oversight Board and have committed to implementing or exploring the feasibility of 81% of its 309 recommendations to date.

As a result of the Oversight Board's recommendations and partnership, this past half:

- Meta [expanded](#) an opportunity to remove a user's first non-severe policy violation strike and any resulting account restrictions by completing a policy education program, in response to a Board [recommendation](#). During a three-month period in the first half of 2025, 80% of Facebook users and 85% of Instagram users who started the exercise completed the module and had their account restrictions removed, and the [system](#) resulted in over two million strikes removed overall from users' accounts across Facebook and Instagram. Nearly 50% of respondents had said they "didn't know the rule" that applied to their violation, demonstrating that a substantial portion of users posted violating content unintentionally.
- To improve quality, accuracy and reduce overenforcement the Board guided product teams to better leverage Meta's [Dynamic-Multi Review system](#) as part of ongoing implementation of the [Policy Advisory Opinion on Meta's Cross-Check Policies](#).

You can read the full report [here](#).

NCMEC CyberTips

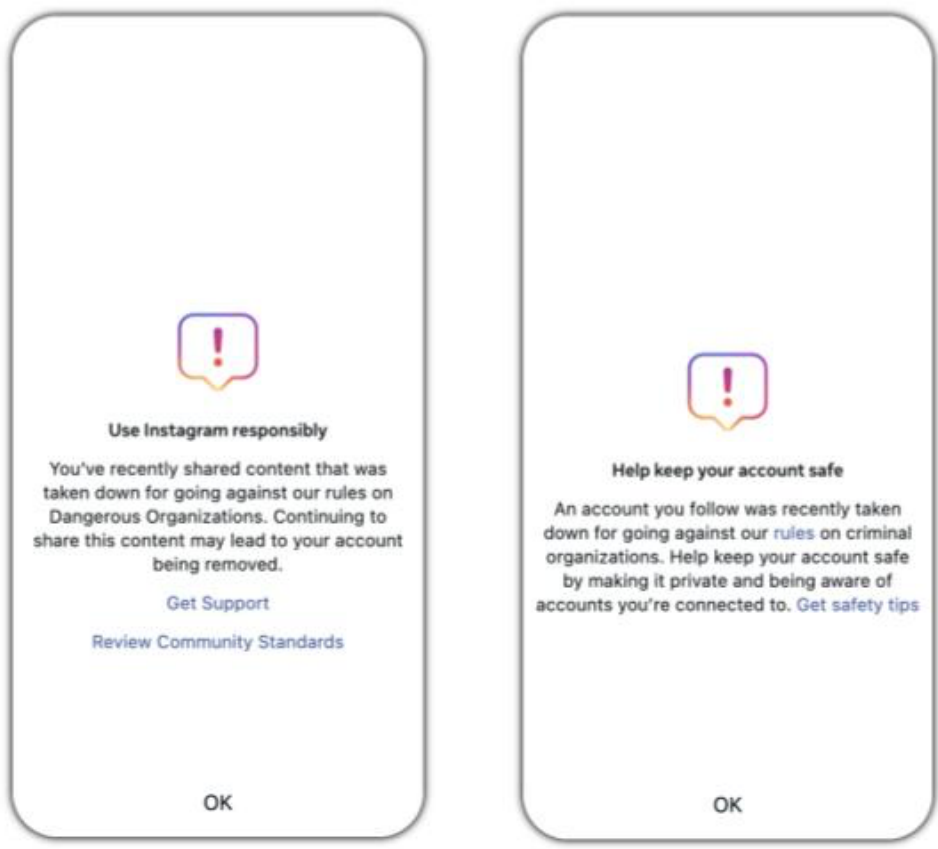

As part of our ongoing work to provide young people with safe, positive online experiences, we're continuing to provide transparency into our efforts to find and report child exploitation to the National Center for Missing and Exploited Children (NCMEC).

In Q2 2025, Facebook, Instagram and Threads sent over 2 million NCMEC CyberTip reports for child sexual exploitation. Of these reports:

- Over 528 thousand involved inappropriate interactions with children. CyberTips relating to inappropriate interactions with children may include an adult soliciting child sexual abuse material (CSAM) directly from a minor, online enticement of a minor, minor sex trafficking, or attempting to meet and cause harm to a child in person. These CyberTips also include cases where a child is in apparent imminent danger.
- Over 1.5 million reports related to shared or re-shared photos and videos that contain CSAM.

Other Integrity Updates

- 2024 Newsworthy Allowance:** In 2022, based on a recommendation from the Oversight Board, we [published details](#) on our newsworthy allowance, including the total number of documented newsworthy allowances and the number of those allowances issued for posts by politicians. From June 1 2024 – June 1 2025, we documented a total of 44 newsworthy decisions, of which 20 were issued for politicians. This updated data is now available in our Transparency Center.
- Continuing Our Focus on Illegal Content:** We have long focused on [combatting illicit drugs](#) and [supporting our users](#) in prevention, treatment and recovery. Buying and selling drugs is strictly prohibited on our platforms, and we have robust measures in place to detect and remove such content. Over the last year we've invested in a new, dedicated team and deployed a range of new methods to detect and remove accounts that violate our Dangerous Organizations and Individuals policy, including accounts which may seek to smuggle people and traffic weapons and illegal narcotics across the US-Mexican border. To complement our wider platform safety efforts, we've also launched a prevention campaign to protect at-risk youth from recruitment by Criminal Organizations and Cartels. Our youth-focused messaging campaigns have reached young people in countries including Mexico, Sweden, and Colombia, delivering educational content to help protect them from potential harm. These efforts are strengthened through close partnerships with regional experts and local NGOs, ensuring our interventions are both effective and deeply relevant to the communities we serve. We are actively expanding these programs to new countries and regions around the globe, while also building out a comprehensive suite of resources to support a diverse range of at-risk youth.
