

Snapchat Transparency Reports are released twice a year. These reports provide important insight into the volume and nature of governmental requests for Snapchatters' account information and other legal notifications.

Since November 15, 2015, our policy has been to notify Snapchatters when we receive legal process seeking their account information, with exceptions for cases where we are legally prohibited from doing so, or when we believe there are exceptional circumstances (like child exploitation or an imminent risk of death or bodily injury).

As technology and platforms have evolved, so too has the practice of providing important information to the public. Starting with this Transparency Report, we are providing insights into the volume and nature of accounts reported on Snapchat for violations of our Terms of Service or Community Guidelines.

We believe these disclosures provide our community with useful information on the volume and types of content reported and enforced on Snapchat. This knowledge will assist us in creating effective solutions to address harmful content.

For more information about how we handle law enforcement data requests, please take a look at our [Law Enforcement Guide](#), [Privacy Policy](#), and [Terms of Service](#).

United States Criminal Legal Requests

Requests for User Information pursuant to U.S. legal process.

Category	Requests	Account Identifiers	Percentage of requests where some data was produced
Total	11,903	19,214	78%
Subpoena	2,398	4,812	75%

Switzerland	10	13	60%	17
Turkey	0	0	0%	1
United Arab Emirates	8	10	38%	0
United Kingdom	304	358	68%	613

* "Account Identifiers" reflects the number of identifiers (e.g. username, email address, phone number, etc.) specified by law enforcement in legal process when requesting user information. Some legal process may include more than one identifier. In some instances, multiple identifiers may identify a single account. In instances where a single identifier is specified in multiple requests, each instance is included.

United States National Security Requests

Requests for User Information pursuant to national security legal process.

National Security	Requests	Account Identifiers*
NSLs and FISA Orders/Directives	O-249	1250-1499

Government Content Removal Requests

This category identifies demands by a government entity to remove content that would otherwise be permissible under our [Terms of Service](#) Or [Community Guidelines](#).

Removal Requests	Percentage of requests where some content was removed
0	N/A

Note: Although we do not formally track when we remove content that violates our policies when a request has been made by a governmental entity, we believe it is an extremely rare occurrence. When we believe it is necessary to restrict content that is deemed unlawful in a particular country, but does not otherwise violate our policies, we seek to restrict access to it geographically when possible, rather than remove it globally.

This category identifies demands by a government entity to remove content that would be a violation under our [Terms of Service](#) Or [Community Guidelines](#).

Country	Number of requests	Number of posts removed or restricted or number of accounts suspended
Australia	42	55
France	46	67
Iraq	2	2
New Zealand	19	29
Qatar	1	1
United Kingdom	17	20

Copyrighted Content Takedown Notices (DMCA)

This category reflects any valid takedown notices we received under the Digital Millennium Copyright Act.

DMCA Takedown Notices
57

DMCA Counter-Notices	Percentage of requests where some content was reinstated
0	0%

Account / Content Violations

We enforced against 3,788,227 pieces of content, globally, for violations of our [Community Guidelines](#), which amounts to less than .012% of total Story postings. Our teams take action on such violations, whether it's to remove content, delete accounts, report information to the National Center for Missing & Exploited Children (NCMEC), or escalate to law enforcement. In the vast majority of cases, we enforce against content within 2 hours of receiving an in-app report.

Reason	Content Reports*	Content Enforced	Unique Accounts Enforced
Harassment and Bullying	918,902	221,246	185,815
Hate Speech	181,739	46,936	41,381
Impersonation	1,272,934	29,972	28,101
Regulated Goods	467,822	248,581	140,583
Sexually Explicit Content	5,428,455	2,930,946	747,797
Spam	579,767	63,917	34,574
Threats/Violence/ Harm	1,056,437	246,629	176,912
Total	9,906,106	3,788,227	1,355,163

*The Content Reports reflect alleged violations via our in app reporting product.

Child Sexual Abuse Materials (CSAM) Takedown

The exploitation of any member of our community, especially minors, is absolutely unacceptable and criminal. Preventing, detecting, and eliminating abuse on our platform is a top priority and we work hard to combat this type of illegal activity, informed by our partnerships with NCMEC, law enforcement, and trusted experts that make up Snap's Safety Advisory Board. In addition to taking action on reported content, we utilize proactive detection methods to stop the spread of CSAM before it occurs. Of the total accounts enforced against for Community Guidelines violations, we removed 2.51% for CSAM takedown.
