

2025 CyberTipline Reports by Country

Most CyberTipline reports involve the upload of child sexual abuse material (CSAM) by users outside of the U.S. This is largely due to the fact that electronic service providers (ESPs) must comply with 18 USC 2258A, which requires U.S. companies to report to the CyberTipline if they become aware of suspected CSAM, online enticement of children or child sex trafficking on their platforms and servers. Because these companies have users worldwide and those incidents are reported to NCMEC, by extension the CyberTipline serves as a global clearinghouse.

When a report is made, NCMEC uses geographic indicators related to the reported incident to make the report available to the appropriate law enforcement. It is important to note that country-specific numbers may be impacted by the use of proxies and anonymizers. In addition, each country applies its own national laws when assessing the reported content. These numbers are not indicative of the level of child sexual abuse in a particular country. Additionally, a report referred to a single country based on where the content may have been uploaded can still have a nexus with other offenders or victims located in other countries around the world, including the U.S..

The following is a breakdown of referrals and informational reports by country. It is important to note that CyberTipline reports are sometimes made available to more than one law enforcement agency. This may occur because a report contains multiple geographic locations for a reported offender and a reported child victim, or for a sender and recipient of CSAM. In these cases, NCMEC will make the CyberTipline report available to all relevant law enforcement agencies.

* Reasons that a country or territory could not be determined include when a report contained little to no location information or when the reported location information, like an IP address, resolved to a hosting or proxy provider. When the country is unknown, reports are made available to U.S. federal law enforcement.
