

2024 CyberTipline Reports by Electronic Service Providers (ESPs)

NCMEC's CyberTipline is a designated reporting mechanism for the public and electronic service providers (ESPs) to report instances of suspected child sexual exploitation. In 2024, the CyberTipline received 20.5 million reports that included 20.3 million incidents. The vast majority of the reports were from ESPs and referred to instances of apparent child sexual abuse material (CSAM) that they became aware of on their systems.

U.S.-based ESPs are legally required to report instances of apparent child sexual abuse material (child pornography), online enticement of children and child sex trafficking when they become aware of them, but there are no legal requirements for proactive efforts to detect this content or what information an ESP must include in a CyberTipline report. As a result, both the volume and content of reports can vary greatly. For more information about reports made in 2024, visit [NCMEC.org/CyberTiplineData](https://www.ncmec.org/CyberTiplineData).

The following is a breakdown of reports by ESPs.

ESP	Reports
4chan community support LLC	3,232
